On such date, Class A and Class T stockholders of record on September 28, 2018, were also paid a cash dividend of \$0.1410 and \$0.1150, respectively. In accordance with Internal Revenue Code section 316(a)(2), any impact on stockholder basis from such cash dividend will be determined, and if necessary reported separately once such determination is made. Distribution rates are based upon the per share adjusted purchase price present during the record period.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ A Stockholder's basis in one (1) share of Class A common stock or Class T common stock after the distribution will be less than the basis the stockholder had in one (1) share of Class A common stock or Class T common stock prior to the distribution, respectively. Please refer to the discussion on line 16.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ The change in basis to a shareholder as a result of the stock distribution would be calculated by taking the adjusted basis of the old stock and allocating it between the old and new stock on the date of distribution. This organization action would result in a decreased basis per share and an increase in the number of shares held by each shareholder.

18 Can any resulting loss be recognized? ▶ No
